

## eXcent confirms its growth ambitions and deploys “PlaneXt”, its 7-years strategic plan

Next step: Paris Air show from 19 to 23 June 2023 - Stand Hall 4 D136

**eXcent - industrial French group - industrial solutions designer and integrator, accelerates its development and launches its new strategic plan called “PlaneXt”.**

This plan is a continuation of eXcent’s previous « neXt » plan, but incorporates ambitious new environmental and societal priorities.

Following its participation in the Companies for Climate Convention (CEC), the CSR approach within eXcent has taken on a new dimension: Although already aware of environmental and societal issues, eXcent wants to go even further!

The essential question is:

**How to transform and develop our industrial solutions to serve the social and environmental transition?**

The result is a new strategic plan:

- ✓ To work **alongside** all stakeholders to **eco-design** and **integrate** industrial solutions on a daily basis in a circular economy logic and aiming at least to be a **contributing company**.
- ✓ **Raising awareness, guiding, measuring, cooperating, re-using, re-employing, minimizing...** these will be the key words for eXcent’s **employees**, as they find a **real meaning** to their daily activities within eXcent.
- ✓ **Making the company more resilient** on economic, social and environmental levels.

PlaneXt will rely on an action plan based on 3 axes:

- Recalibrating our value proposition
- Regenerating the Earth system
- Reshaping leadership by empowering people

*“ Our aim for 2023: to become an **Eco**-designer and integrator of **sustainable** industrial solutions.”*

**Philippe Chaumès**, CEO of eXcent group

- The Paris Air Show is a key event in the aeronautics and space industry and is also a key stage in the PlaneXt growth plan. eXcent will be showcasing its expertise in virtual and augmented reality (XR) by offering visitors an interactive workshop as well as the latest solutions developed for its customers. It will also be an opportunity to exclusively test the digital twin of our new JacXson product range: the JacXson XL!

**Paris Air Show–Hall 4 Booth D136**

### Focus on recruitment

As part of its development and to meet the needs of its customers, eXcent is expanding recruiting.

**More than 120 permanent contracts** in France and abroad:

- Design engineers
- Technical pilots
- Designers
- Project managers
- Product / project / system quality engineers
- Methods / industrialisation engineers
- Industrialisation project managers
- Maintenance engineers

## About

eXcent, industrial solutions designer and integrator, provides a wide range of expertise to each of its clients. We propose and develop specific and effective solutions. eXcent's industrial vision is based on our ability to anticipate production needs for agile product/process development. eXcent is financed with 100% private capital, currently we have 700 employees, 14 locations in France, 4 abroad. Annual turnover in 2022 was €90M.

eXcent has been managed since its creation by Philippe Chaumès. [www.excent.fr/en](http://www.excent.fr/en)
